

We set things
in motion

We are ConMoto

As independent consultants, we have been creating enthusiasm for change since 1990. Companies with great ambitions are driven by enthusiasm.

We are proud of our ability to put ideas into actions. We put people in motion to allow them to achieve their goals.

We clear
the way

Removing obstacles is the first step toward success. Eliminating errors in order to move quickly is the hallmark of a successful business.

We make sure nothing stands in the way of your success.

We achieve progress

We always think about strategy and implementation as two sides of the same coin. Concepts and ideas alone have never helped a company get to the top.

Implementing change is a critical part of any solution that results in quantifiable improvements.

We speed up your production

We develop individual production systems that improve your entire value creation process. Our integrated approach combines speed and accuracy. You can measure gains in efficiency in your production plants by improvements to your bottom line.

We think and act strategically. Our job is not done by providing analysis and concepts only. Seamless implementation is the key to sustainable progress. We motivate your employees, speed up your production systems and find solutions that give you a payout in dollars and cents.

We ensure that production **flows** are unimpeded

The purpose of logistics is to ensure an uninterrupted supply of materials. Without motion, there is no productivity. Our projects transform your company into an agile, learning organization.

We empower your employees to control the flow of information and material. Intelligent logistics integrates your suppliers, creating processes that are in synch with your clients.

It is a joint effort to create logistics solutions that use production areas and personnel efficiently. Innovative storage and transportation concepts that help your suppliers and clients give your company a competitive advantage.

We keep your systems **running**

Production interruptions are the enemy of profit. Machine breakdowns and errors impede production and directly affect your operating profits. As the leading consultants for maintenance and asset management, we use our experience

to make sure your plants and machines run reliably.

Value-driven maintenance systems are the driver of availability and process stability. We ensure excellent processes and make your company fit for the

future. By applying successful best practices for all production areas, we transform maintenance into a driver of efficiency for your productivity.

We find **new paths** to profitable products

By combining creative thinking and structured methods we unlock the innovative potential of your business. Our goal: well-engineered products that provide value to your customers.

Improving innovation while cutting production costs is our remedy for stagnation.

We empower R&D

Efficient development processes are a prerequisite of success. We help you transform ideas into successful projects at a faster pace.

To open new horizons for your business, we help create an environment that values technological innovations.

We bolster the **value orientation** of your procurement

Value-oriented procurement balances quality, customer satisfaction and cost awareness. Optimizing your procurement practices unlocks potentials and makes your processes efficient. We work hand in hand with your employees to integrate your sup-

pliers. All efforts are combined to maximize customer value.

Value-orientation does not focus exclusively on procurement costs, but also pays attention to added value for your customers.

We expedite careers

People who work at ConMoto drive change in your business. When people grow as individuals they foster progress. That principle is true for our consultants and our clients.

Many former ConMoto consultants are in the top management of successful companies or have become entrepreneurs.

We are proud if our employees grasp the opportunities we offer to accelerate their professional development at ConMoto or in other areas of their careers.

ConMoto has been supporting equestrian sports for more than two decades. We support talent and reward the drive for achievement. One of these talents is Finja Bormann, who can be seen here in the saddle at the CHIO Aachen. She is among Germany's best young riders and was a competitor at the European Championships for Young Riders in 2017.

We care and we get involved

We believe with success comes the obligation to take on social responsibility. We support people who make society better. That is our investment in the future.
